

HIGH PERFORMANCE WEB HOSTING

July 25, 2014

To all Virtual Planet Customers,

Nearly 14 years ago I opened a company called Schiller Networks. As Schiller Networks grew and email and web hosting was becoming critical to my clients, trying to work with the large hosting companies became a huge challenge. So I built my own server and started hosting many of my clients' email and websites - beginning the business you know as Virtual Planet. This allowed me to personally take care of my clients better than I could before, with many more features and instant account changes, it was no longer necessary to spend hours on the phone with the big companies.

As most of you know I sold Schiller Networks to My IT Guy two years ago. If you've called in for tech support in the last two years you've probably already spoken with Adam, Don, or Steve.

Adam is continuing to grow My IT Guy and expand his own hosting services. He already offers web site and email hosting to many businesses like your own, and wants to build upon that success by taking on Virtual Planet's services.

By doing this he will now have easier access to service his customers better than most companies in his field.

So it comes with great pleasure to announce that effective immediately My IT Guy is now running Virtual Planet Inc. I will continue on for the next few months to assist with this transfer.

Thank you all very much for your support over the last 10 years. It has been a pleasure and an amazing experience.

If you have any questions please don't hesitate to contact myself or

Adam:
